

# Findings and Recommendations on Emancipation

## Findings

1. The research indicates that a significant number of minors seek emancipation due to familial conflicts and a desire for independence.
2. Legal and social support systems for emancipated minors are often insufficient in providing necessary guidance and protection.
3. Emancipated minors frequently encounter challenges related to housing, employment, and access to healthcare.

## Recommendations

1. Develop accessible educational programs for minors considering emancipation, detailing rights and responsibilities.
2. Strengthen social support services, including counseling and legal assistance, for emancipated youth.
3. Encourage the creation of partnerships between government agencies, NGOs, and community organizations to provide comprehensive support.
